

CALCULATING NUMBER OF PLANTS NEEDED PER SQUARE FOOT

To figure the number required to plant a given area, multiply the number of square feet by the number of plants per square foot using this table.

ON 6" CENTER – PLANTS PER SQ. FT. = 4

ON 8" CENTER – PLANTS PER SQ. FT. = 2.25

ON 9" CENTER – PLANTS PER SQ. FT. = 1.77

ON 10" CENTER – PLANTS PER SQ. FT. = 1.44

ON 12" CENTER – PLANTS PER SQ. FT. = 1

ON 18" CENTER – PLANTS PER SQ. FT. = .44

ON 24" CENTER – PLANTS PER SQ. FT. = .25
